RECEIVED 14 OCT 2002

For *the* attentions of John Hancock

11th October 2002

Dear John,

Ridding School, Ridding, Essex/High Beech School, Loughton, Essex.

Following the recent installation of Sonaspray to the ceiling at Rickling School, we would confirm that we are delighted with the finished product and the performance that it provides.

The client is also more than happy and they are now putting their new hall to good use.

The speed of installation was critical within our build program and to have only two trades (yourselves and the plaster board fixers) saved us both time and money. We have carried out a costing exercise against perforated acoustic plasterboard, and have found that both time and expense for this system means that Sonaspray is the best solution for us. As you know it can be difficult to persuade County Councils to try new systems and they are also happy with the system and we have specified it on High Beech School. O

We also have a new school hall at Buckhurst Hill in Essex, which we are due to commence within the next month, and have again specified SonaSpray to the Council. It is our intention to specify your product on all further school halls we work on for the Council.

Should you have any prospective clients who would like to see the product "in situ", then we would be happy to let them visit one of our sites, or would arrange for you to visit a completed school.

We look forward to continuing our working relationship with Oscar Acoustics and thank you for your work to date.

Yours sincerely,
FOR ATT

Phil Edmonds
Project Manager.
